M. D. of Cereal

The council of the Municipal District of Cereal No. 212, met in the municipal office at Oyen, Alberta on Saturday, July 12, 1930, at 10 a.m.

All councillors were present. The roadwork pay sheets were passed.

The accounts were passed. Correspondence was presented to the council and dealt with.

The council agreed to sell the N. 1/2-20-28-4-4, on a lease agreement to John Shields, Oyen, Alta., and the E. 1/2-28-6-4, to Frank Sauve, Cereal, Alta.

The secretary was permitted to take a vacation in August. The council agreed to pay one half the costs of the fire brigade attending the fire of the Kornichenko home.

Council sat as a court of revision to hear and deal with appeals against the business assessment for the year 1930.

The secretary was instructed to reply to a letter received from the Municipal District of Golden Centre.

The council passed a by-law making a grant of \$200 to the Oyen Agricultural Society.

A special appropriation of \$145.00 for roads was made by the council for Division No. 2.

The Reeve and Secretary-Treasurer were authorized to borrow from the Bank of Toronto sufficient funds to take care of the accounts passed.

Council adjourned to meet again on Saturday, August 9, 1930.

M. D. Golden Centre

The 14th meeting of Council of the M. D. Golden Centre No. 272, was held at the N.E. 13-30-5, on Saturday, July 5, 1930.

Members all present.

Council called to order by the Reeve and business transacted as follows:

Minutes read and confirmed. Correspondence read and disposed of.

M. D. of Cereal was requested to complete road north of Excel four miles to connect with our road leading to town.

The director of town planning was requested to approve location of Nuisance grounds at Naco.

The director of town planning advised that it would be necessary to secure permission to erect signs and signboards on highways.

Financial statement to June 30, was read and accepted.

Following accounts were paid: Ed. Stewart and A. Jorgenson, 2.00 each for aiding surveyor; Chapman and Slessor Agency, premium on Blair bond, 6.00; Cereal Recorder, notice of sale, 2.00; Western Municipal News, notices and forms, 23.30; Richardson Road Machinery Co., machinery, 45.25, and culverts, 16.77; Ralph Greene, salary, 133.35, office expense, 10.00 and express on repairs, 3.00; Mrs. O. Michaels, rent, 6.00; George Hallet, relief, 20.00; Central Alta. Sanatorium, re W. J. Evans, 41.00; S. W. Miller, farm tools, 7.0, and express on repairs 1.15; R. I. Calver, impounding bull, 5.00; L. A. Walper, deficit at sale, 12.20; G. H. McLaughlin, stamps, 15.00; C. Caldwell, blacksmith account, 4.00; J. Hazelwood, blacksmith account

Robert Gardiner Elected by Acclamation

Mr. Robert Gardiner, member for the federal constituency of Acadia, was returned to office by acclamation last Monday, no other nomination being received.

Another Timely Rainfall

Half an inch of rain fell last Thursday evening between 9 o'clock and 9.30. This was followed by a further rainfall after midnight which measured .23 inch, making a total of .71 inch. Heavier rainfall was reported in Acadia Valley and Cappon districts.

Fortnightly Crop Report

The high temperature of the past few days has been most welcome in the Northern and Western parts of the Province; the moisture supply is abundant. Crops in this area have made excellent growth, but continued cool weather in June has tended to retard progress toward maturity. The present warm, bright weather will correct this condition.

The Central Eastern area may be described as patchy. In some parts the recovery has been remarkable, due to frequent showers. At other points, less favored, recovery is only partial. On the whole the crop outlook continues to show improvement.

Along the line of the Calgary-Medford Railway there is a promise of a normal crop. Eastward and South crops have suffered from drought during the past fortnight. Rainfall at various points over this area in the past few days, has brought a measure of relief and a more optimistic outlook. About 20 per cent of wheat is in head and the remainder in the shot blade.

Hail damage has occurred at several points in the Province, but the areas involved are not large. Coarse grains are making favorable progress. Haying is general throughout the Province, the crop being reported slightly below average on account of the cold dry spring. Sugar beets are reported to be a good stand and developing normally. Pastures are good and livestock making excellent gains.

17.50.

The committee on proposed roadway through the west side of 25-5, reported the most feasible division to be between sections 18-19 and 17-20. Councillor Stewart was empowered to sell hay on section 10-31-6, at his discretion.

It was decided to make grants to Hamlet No. 56, the district at 75 per cent of the levy.

By-law No. 49, authorizing \$100.00 grant to the Salvation Army, and \$25.00 grant to the Canadian Red Cross, was read three times and adopted.

By-law No. 50, authorizing \$50.00 grant to Oyen Agricultural Society, 37.50 to Chinook Agricultural Society and \$5.00 to each school district participating in a school fair.

Council adjourned to meet at the N.E. 13-30-5, on Saturday, August 10, at 10 a.m.

How's Your Bank Account?

It is a common thing for parents to open a bank account for a very young child, taking care of the account until the child is old enough to manage it. Then the bank book is turned over, and Dick or Ruth shoulders a new responsibility.

In this way the child, early in life, taught the valuable habit of thrift. Practical lessons in the keeping of accounts and records are learned. And as these small savings are conserved and mount upwards, a substantial sum of money is created which will make adequate provision for the later education of the child, or constitute a reserve capital to start a boy in business or enable a girl to assist in establishing her own home.

Famous leaders in commerce have said that regular saving, even on a small scale, is the surest foundation for financial success. To save only five dollars a week is to build up a financial reserve, which will grow. To contract five dollars debt weekly is to accumulate a growing burden.

Nature starts each of us in life with an account at the Bank of Health, which is handed in trust by older folk, until we reach the age of responsibility for the care of the body. It makes all the difference in the world whether we handle our health account wisely or foolishly.

How is your account at the Bank of Health? Have you a good balance? Is it shrinking instead of growing? You ought to know.

Nature abhors and punishes waste while she approves and rewards thrift, both in what we call the big realm of Nature and in the individual human life.

Experts tell us that reckless and unchecked cutting and fishing threaten the existence of some of the world's largest forests and fisheries. The supplies we thought unlimited may fail. We are learning that continuous supply depends on conservation, which is simply a bigger word for thrift.

The same is true of health. Nature exacts heavy penalties for waste. Preventive work promotes and maintains the health of the body. Just as a savings account is built up by small deposits, so, too, must our health reserve be built up. Enough food and exercise, enough rest and relaxation, must be deposited in the Bank of Health every twenty-four hours.

These deposits must be in good currency. Not Nature, like our bankers, accepts no bad bills or counterfeit coins.

Why not look into this matter of your account at the Bank of Health? A wise way to begin is to go to your doctor for a thorough medical examination. Don't wait until you are sick to visit your doctor; go to him when you are well and have him check you up. Take stock.

Another good plan is to get a thorough medical examination at least once a year—say, on your birthday anniversary. In this way any disease which may, quite unknown to you, be making insidious headway, will be discovered in its early stages, checked and cured, but which if left to develop undisturbed until you begin to "feel sick" may by then have reached the stage where it is beyond cure.

World's First Talkie Sign

Novely Introduced At Chicago By Envelope Company

What is probably the first talking sign in the world made its debut before a crowd of over 3,000 Rotarians with a speech boasting Chicago, telling about its schools, churches, parks, playgrounds, libraries, universities, boulevards, policemen and other civic assets.

George D. Gaw of the Gaw-O'Hara Envelope Company, is responsible for the sign, which is 50-by-20 foot affair on the envelope company's plant in North Sacramento boulevard.

The speech was made before the microphone and amplified through the loud speaker hidden in the sign. Lettering bit in the future records lauding the city and boasting for its "Century of Progress" will furnish voice to the sign throughout the day, according to Mr. Gaw.

Motorist Sued For Train Wreck

Had To Pay \$10,000 For Causing Derailment In Illinois

Automobile drivers must pay for the train wrecks they cause under certain circumstances. Such was the gist of a decision handed down by the district court for the southern district of Illinois and reported by the legal department of the American Motorists' Association. The suit arose as the result of a motorist derailing over the tracks of a railroad, causing the derailment of an engine and five freight cars. The railroad sued the motorist for \$30,000. A verdict of \$10,000 was given, which was sustained on appeal to the higher court.

A tornado may travel as slowly as ten miles an hour, or it may speed at sixty.

Lead Mines of Spain and Britain were worked more than a thousand years before Christ.

Four Doses Relieved Bad Attack of Cholera

Mr. W. C. Cooper, Maughan, Alta., writes: "A year ago last spring I arrived in Canada with my family. One of my boys, aged six, was suffering very much with cholera. When we arrived I had the station doctor call, and told one of the attendants at the station that it was cholera. I had never tried Dr. Fowler's Extract of Wild Strawberry. I had never heard of it in England, so I told the doctor that it was in Winnipeg. I am pleased to say I got well and was quite cheerful by the next morning."

Airplane Flight To Far North

Government Thinks To Open Up Air Route In Sub-Arctic Areas

To inspect aeroplane supply caches in the Canadian sub-Arctic and with a view opening up aerial communication routes in the barren lands belt, in the Northwest Territories, a special detachment of the two government aeroplanes will leave Rockville Aerodrome in the near future for an air tour which may extend over 25,000 miles, most of it over a little travelled country.

Flight Lieut. P. J. Mawdesley, of the civil aviation branch of the department of mines, will be in charge and will pilot one of the two planes. Flight Sergeant H. J. Winty will pilot the other. In addition to the two pilots there will be two mechanics, Corporal S. C. Darway, who will be the camera operator, and C. S. McDonald, inland surveyor of the topographical surveys.

The flight will be the first official government step toward the opening up of air lanes in the North West Territories. The majority of the trip will be in the vicinity of the Mackenzie River Basin, the Great Slave Lake area and northward to Coronation. The flight will also travel over that part of Canada lying to the west of Hudson Bay north of Churchill. With only a few exceptions all the routes to be inspected will be to the south of the Arctic circle.

The detachment will return to Ottawa before the freeze-up.

SUMMER HEAT

HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The heat often throws the little stomach out of order so quickly that unless a doctor is called at hand, the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most common. Any of these troubles may prove fatal. The danger is increased during the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, soothe the stomach and keep baby healthy. The Tablets are sold in every drug store or by mail at 25 cents a box from The Williams' Medicine Co., Brockville, Ont.

Edmonton Exhibition

Price List Contains Regulations Regarding the Sale of Live Animals

The Edmonton Exhibition price list contains regulations in the cattle section, that any animal exhibited, which has been so treated as to alter its natural condition, is to be disqualified. Competent veterinarians will examine the cattle to ensure the enforcement of this regulation. This is in line with the present wide agitation to eliminate the cutting of ties and the surgical or other treatment of show animals for show ring purposes.

After Ten Years Of Asthma Dr. J. D. Holliday of the Boston Herald has the only relief for one grateful user. "I have been suffering from asthma for ten years. I have tried everything but nothing has helped me. I have heard of Dr. Holliday's remedy and I have tried it. It has cured me. I am now free from asthma. It is the greatest asthma specific within the reach of suffering humanity."

Chicago Stock Exchange

Suggested That Membership Be Extended To Canadians

The governing committee of the Chicago Stock Exchange has recommended to the membership of the exchange that the constitution be amended to admit Canadian citizens. Unanimously approved by the members in ten days, the proposed change will be submitted to the stockholders.

Announcement was also made of plan to extend the Chicago Stock Exchange's ticket service into Canada within the next six months.

A Huge Birthday Cake

One of the largest birthday cakes ever cut in London was consumed recently when the British and Foreign Bible Society celebrated its 125th birthday. The cake weighed 126 pounds—a pound for every year—and carried 126 candles. The cake was made in the design of a Chinese building.

Voluntary Bird Census Takers Many hundreds of persons in Canada and the United States are voluntarily assisting in the taking of a waterfowl census to determine any increase or decrease in the number of waterfowl that inhabit North America. This is not strictly a census, but very valuable data are being secured.

Minard's Liniment checks Colic at once.

Saskatchewan Loses Valuable Man

Dr. W. Carrothers Accepts Appointment At University Of British Columbia

Dr. W. Carrothers, professor of economics at the University of Saskatchewan, who has accepted an appointment as professor of economics at the University of British Columbia, will leave Saskatoon in time for the opening of the fall term some time in August.

Born in the County of Parnagh, Ireland, Dr. Carrothers attended college at Belfast, coming to Canada in 1911. He attended Wesley College, affiliated with the University of Manitoba, graduating from there in 1916 with the degree of bachelor of arts. Upon leaving university, Dr. Carrothers enlisted with the 44th Canadian Infantry, later transferring to the Air Force. He was awarded the D.F.C. and the Croix de Guerre.

Following the war, he attended Edinburgh University and studied under Professor J. Shield Nicholson, obtaining the degree of M.A. He was appointed to the staff of the University of Saskatchewan as professor of economics.

Dr. Carrothers was a member of the University of British Columbia, the departments of economics, sociology and political science are in the vicinity of the Mackenzie River Basin, the Great Slave Lake area and northward to Coronation. The flight will also travel over that part of Canada lying to the west of Hudson Bay north of Churchill. With only a few exceptions all the routes to be inspected will be to the south of the Arctic circle.

The detachment will return to Ottawa before the freeze-up.

The Imperial Conference

Material Resources and Wealth

The British government intends to enter the Imperial Conference free and unfettered by prejudice or bias. The Imperial Conference will be held at the Imperial Conference at Colchester, Essex.

Mr. Thomas proceeded to discuss the unemployment problem and Great Britain's handicaps as the result of the financial burdens of the war. He said the Imperial Conference would give a unique opportunity for a free and unfettered discussion of all the aspects of the problem. As he had examined it, everything the United States possessed in material resources and wealth was possessed within the grasp of the British Empire.

"It is because of that knowledge that I, on behalf of the government, announce we intend to enter the Imperial Conference to consider every problem on its merits, unfettered by prejudice or bias, and prepared with a single undivided desire to reach a solution of the problem," he said.

Has Heavy Task

New U.S. Minister To Canada Has Busy Days Ahead

The United States senate without a record vote has confirmed the nomination of Colonel Harford L. MacNider, of Iowa, as minister to Canada.

His tasks as American minister to Canada will be trying. There is bitter resentment throughout the provinces toward the new tariff bill. The stipulations of prohibition enforcement on the border have almost paralyzed the patience of Canadians. The administration of the immigration laws, too, stands in need of civilizing.

Colonel MacNider has many busy days ahead of him—Memphis Commercial Appeal.

Japan Building 'Planes Army airplanes built entirely in Japan are proving highly satisfactory, according to an official report issued by the aviation department of the ministry of war. Recently two scout planes made night-flying tests in which they met every requirement of safety, speed and general airworthiness. Airplanes are now being manufactured extensively by the Kawasaki and Mitsubishi dockyards.

Minard's Liniment for All Strains.

The Bishop's Discovery "I never knew until I got a cat," said the bishop, "that profanity was so prevalent."

"Do you hear much of it on the road?" "Why," replied the bishop, "nearly everybody I bump into awakes dreadfully."

Serious Rectal Troubles Often Caused By Harsh Cathartics

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quick dispatch.

Montreal An Important Port

Claims To Hold the Lead As a Grain Exporting Port

Despite the retarded grain movement in Canada in 1929, Montreal continued to hold the lead as a grain exporting port in North America, the companies with other main ports on the continent being given in the Montreal Harbor Commissioners' annual report as follows:

Montreal 90,694,208 bush.
New York 68,895,992
Galveston 35,746,057
New Orleans 18,579,799
Baltimore 17,600,949
Philadelphia 9,419,585

Mobile 1,115,650

UNCOOKED SALAD DRESSING

Warm weather and plenty of vegetables combine to make the tempting salad a frequent dish on the menu. The secret of a delightful salad is the dressing and here is the recipe for an uncooked salad dressing that will be relished by every member of the family—and it can be made up quickly and, once made, it will keep for weeks:

1 cup vinegar.
1 teaspoonful salt.
2 cup vinegar.
1 can Eagle Brand Milk.

Best vigorously all ingredients except vinegar, for a few minutes. Add vinegar, stir well and set aside for a few hours to thicken.

Persian Balm is magical in creating alluring complexion. A little gentle rubbing and your skin is invigorated and touched with the true beauty of youth. Charming! Fragrant! Delightful to use. Cools and soothes the skin. Removes all roughness and chafing caused by weather conditions. Tones and stimulates. Enhances and protects the loveliest complexion. Unrivaled as a perfect aid to beauty and health.

The Regina Leader-Post says: "An optimist is a man who expects to do this year's business on last year's advertising."

Talkies in German were recently shown in Helsinki, Finland, with some success.

Don't Let Foods Spoil

Foods that ordinarily stale quickly will stay fresh and tempting as surprisingly long time if you cover them with Para-Sani Heavy Wax Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, easy-to-use, knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's Centre Fold Packs.

Aids To Flying

Canada Willing To Work With U.S. To Better Conditions

The Canadian Government is ready to work with the United States for a closer co-ordination of airways communication and radio aids to air navigation, says a report from Washington.

Secretary of State Stimson said that word to him from the Dominion Government indicated it would accept the recommendations of an informal radio conference held in New York last April, urging this closer co-operation.

Among the recommendations acceptable to Canada were that the international air-circling frequency, 333 kilocycles, be not required regionally for aircraft or aeronautical stations in either country.

The conference further recommended that different national frequencies be established for the United States and Canada; that a long list of frequencies remain free from assignment by the United States within 750 miles of the Canadian border, and that this country be followed by Canada with other frequencies.

Industrial Manitoba

Annual Industrial Output Has Reached \$162,000,000

In the six years history of Manitoba as a province, the industrial output has grown from \$80,000,000 in 1922 to \$162,000,000, and the number of plants from 6 to 830.

The output of iron products in Manitoba increased \$5,248,000 last year, and now stands at approximately \$24,000,000 annually. The output of agricultural implements in Greater Winnipeg's plants has grown from \$377,000 to \$1,187,000 in five years.

Winnipeg's furniture factories during the five-year period, 1924-1929, increased their output from \$137,683 to \$746,523, and they employed 146 more people and paid out \$357,000 more in wages.

Production among the various industries manufacturing products in Manitoba now exceeds \$14,000,000 annually. The group showed an increase of \$1,268,000 last year over the previous year.

Anniversary Of The Strawberry

Four Hundred Years Since It Was Cultivated In England

This is the 400th anniversary of strawberries as a cultivated fruit in England. It was in 1594 that the famous berry of many had as a purchaser Henry VIII, who paid 10d. for a half a pint or "a potter" of strawberries as the measure was then called. This, of course, was big money, for 10d. in those days meant as much as 10c. and more in these times.

In Eastern Canada the wild strawberry grows in such profusion and is such splendid eating that the cultivated berry takes a back seat. This is not so, however, in other parts of the American continent. I have been to the strawberry fields in Garden City, Northern Michigan, on the shore of the lake, and for ten cents (6d.), one could pick and eat all one wanted and stay as long as one liked. —London Sunday Pictorial.

Foreign Americans

A young woman who left to reside in Paris, shortly after her marriage, six years ago, has returned to De. trait with her two small children. One is a girl of 4; the other a boy of 2½ years. Both children speak only French. In fact, neighbors say the baby cries even in French. The little girl has mastered one English word — ice-cream.

Changed In Some Ways

"I'm glad to find you as you are," said the old friend. "Your gear would have changed you in a way." "Well," replied the wealthy man, "I has changed me in the way I'm now contented where I used to be impulsive and 'delightful' aristocratic where I used to be a rule."

"I hear that you have lost your wife as the result of a motor accident. Are you comforted?" "No, yes. The insurance companies are so slow in paying." —Knutson, Charlton.

W. N. U. 1846

Instruments Needed For Good Orchestra

Names Of Many Are Not Familiar To Most People

"Music has charms" so we have heard; but it must have its orchestra, if the conductor of the orchestra has to remember the names of all the instruments. We used to think that an orchestra was most a matter of a piano, violin, and cello, and saxophones—large numbers of saxophones. The excellence of the orchestra depended on the size, and the variety of banyard sales that could be played upon them.

We did, however, that our education has been sadly neglected. In a recent issue of the London Musical Courier we are given a list of the instruments that are represented in a good band or orchestra. As well as the usual items the list read like a menu. Thinking we had arrived at the salad course, we did indeed, which might be society for celery, gresso calico—and suddenly French for a fancy vegetable salad as carrots or spinach, while the corn of corn of bassetti, tubas, euphoniums, fagottos, euphoniums, and special guided such dishes as macaroni and raisin pie, and pickled peas' feet.

Checking the output closer we found to our surprise that musicians are quite familiar not only with the above but with some 56 other varieties, the least intriguing of which were bassoons, bombardiers, contra-bass (sounds like a fish), euphoniums, and heckelphones. This brings home to us the clustering thought that musicians evidently earn their living by the sweat of their brows, and by merely learning to tout or fiddle a little. Apparently most of us will have to look to something other than a musical career if we are to find an easy road to fame and fortune. —Regina (Evening) Leader-People.

Baling Hay In India

Machines Have Been Adapted To Conditions of the Farm

Manufacturers of hay baling machines are adapting their machines to the new demand for balers which may be used in the field to bale from the cock or in the windrow. The use of cyclinder engines mounted on the baler is one interesting feature. The engines are of the size and type used on combine.

In order to take advantage of the direction of the wind or the lay of the land, the feed table is arranged so that it may be used from either side of the baler. Extra capacity has been added to speed up production and lower the cost of baling, by making it possible to feed the machine with bags, chaffs, while automatic facilities for placing the baler are included. Longer baling chambers are used in order to give the wire man more time to tie a good bale.

For stationary baling, automatic feeders have been developed. This enables the operator to feel at all times and usually makes it possible to eliminate a man from the baling crew.

The Cry For Speed

When Daredvils Put Their Skill To Establish New World Records

The world cries for speed—more speed. Automobiles, so-called, and boats that are only paper-thin shells housing monstrous engines are constructed at enormous costs in order that daredvils may put their skill, not against one another, but against time, to establish new world records. The excuse that is offered to justify such recklessness is that refinements necessary to high speed are utilized for the betterment of all vehicles. But the real reason is that man likes to boast of having done something that no other has done. A nation feels pride when one of its nationals becomes a "world champion." —Washington Post.

May Revive Game Laws

Revision of the game laws of Saskatchewan, is contemplated by Hon. J. A. Merkle, Minister of Labor and Industries, in whose department rests administration of the Act. A legislative committee of the Fish Game Association will prepare tentative changes to be submitted to the next meeting of the Legislature. One of the chief changes proposed, will provide a new system of licensing.

Holiday Restrictions

According to the strict letter of British law, a holiday-maker may not wander at will over a common, but must keep to the recognized footpaths. Even when walking on a path he road he must not bother to review the scenery or make a sketch. Fortunately, law of this kind is more honored in the breach than the observance.

Looking After The Tourist

Method Used In France Is Not Necessary In Canada

Adolph S. Ochs, publisher of the New York Times, recently made a speech in Paris, in the course of which he praised the French "Ministry of Tourism," whose business is the attraction of tourists to France, and their protection while in France. It tries to see that French travellers and other not employ extra-territorial protection. In proportion to its population, Canada probably has more tourists than the Republic of France, and most of us try to treat them well. We do not suggest that the Federal Government should set up a "Ministry of Tourism," but the business is one of vast importance to the Dominion, and therefore it deserves all the consideration and assistance which it is getting from the Federal and Provincial Administrations. Probably it should have even more attention.

Demonstration Farm Records

Six Notable Records In The R.O.P. At C.P.R. Strathmore Farms

The Canadian Pacific Demonstration Farm at Strathmore, has just made six notable records in the R.O.P. with two and three-year-old Holstein heifers, one of each age producing far more than sufficient quality for a place in the 20,000 pound list of cows. All of the heifers, excepting one of the two-year-olds, were bred at the west end of the three-year-olds made their records in the 200 day division. The leader in the group, Strathmore Poulton, Poulton, a three-year-old, in the 200 day division produced 23,603 pounds milk and 10,745 pounds butter with an average test of 3.63 per cent. fat.

New Slot Machine

Coin-in-out safety locks for slot machines are being installed about some of the public buildings in Berlin. After one of the city's thousands of cyclists has chained his wheel to a small box at the curb, it locks automatically. He then inserts a coin which releases the key to the lock and returns the curb to its ready to use the bicycle again.

A New Method

Beggar: "Do you happen to 'ave lost yer purse, me lord?" His Lordship (hurriedly feeling in pockets):—"Ah—no." Beggar: "Then perhaps you can let me 'ave a little assistance, me lord."

Skull on Side of Rock Commemorates 'Soapy' Smith

"Soapy" Smith was a tough guy. He shot men for the fun of it and robbed them when there was nothing better to do. He had a trick of appearing to wrap a cake of soap in a five dollar bill and of selling it to a gullible customer for a few cents.

Because of that they called him "Soapy" up in Skagway in the gold rush days of '98. But "Soapy" was too tough and too slippery even for the rough frontier of the north. One day he was a bit slow on the draw. He was shot and killed and buried with his antagonist, who he had mortally wounded, in the little cemetery adjoining the town.

Somebody had the idea and hoped for death arrived the townspeople apparently thought something should be done to commemorate the end of a desperate career. Someone had said that "Soapy" was as hard as rock. So they painted a skull on a cliff and labeled

Filing Homesteads In North

Push To Take Up Land Near Prince Albert

More homesteads are being filed upon north of Prince Albert this year than any year since the country has been opened up and the push to take up land is unprecedented, according to J. W. McDermid, prominent Prince Albert merchant.

Mr. McDermid states that the new settlers are nearly all Canadians and Americans. They appear to be a deep red sandy loam, and believe to be the last chance to secure free land in northern Saskatchewan. Settlement has pushed out 80 miles northeast and northwest of Prince Albert as a result of this activity.

The Prince Albert citizen sang loudly the praises of Emma Lake, a new summer resort 30 miles north of Prince Albert, which is being developed by a deep red sandy loam, and set in scenery which he declares to be unrivalled for beauty even in that land of fine scenery.

The lake, Mr. McDermid said, will be one of the biggest drawing cards for tourist traffic since it is situated only a few rods off the main highway to the new National Park. He said that tourist traffic into the north has been improved this year by unusually heavy and continuous rains. "It has rained almost every day this season," he said, "and as a result the growth of grain crops and grass is luxuriant."

National Research

Canadians Returning From United States Appointed To Laboratories Staff

Twelve appointments to the professional staff of the National Research Laboratories have just been announced. Three of these appointments are returning to Canada from positions in the United States, these being: William E. Graham, research fellow at the Mellon Institute for Industrial Research, Pittsburgh, Pa.; E. G. Ballard, of the Westinghouse Electric and Manufacturing Company, Pittsburgh, Pa.; and Morris Katz, investigator, Trail Smelter research, International Iron commission, Northport, Washington.

Odious Of Electricity

People are greatly in a reluctance to electricity. A shock strong enough to kill a sober man drunk, and a person is less liable to be killed by an electric shock if asleep at the time it is received. People suffering from diseases are usually very sensitive to electricity, but idiots are just the reverse.

The Collar Nuisance

Plaint Is Raised From The Long-Suffering Male

Collars are a nuisance. Much has been written about the illogic of man's dress, about trousers that are ugly, coats that are hot, socks that are always slipping down; but of the twenty-old items of apparel (counting collar buttons) that a man wears, the collar is the one that causes the most pain for its wearer.

There have been several reasons advanced for the continued use of the collar. Some say that it is a relic of that age when men wore beards about their necks as evidence of their slavers, and that the survival is due to the insistence of the modern woman that her husband put his collar on when company comes, to show that he is still. There is evidence for this argument in the fact that the man usually puts his collar on. Others say that the collar really survives with the male use of ruffs in the Tudor age when men wore too busy to wash their necks.

But such arguments stand on more or less flimsy ground. The real source of the collar's persistence has been in Adam's attempt to conceal the fact that he could not swallow everything his wife handed him. There was a lot of fruit, you remember, that lodged in his neck.—Edmonton Journal.

The Flickering Light

The Deafened Hero Is Always a Pathetic Figure

Fortunate are the men who walk with the quiet lanes of life, content with the performance of modest duties. Remuneration is not for them, nor do they seek of the world. They are content by their friends in the fulfillment of duty. When they at last leave off, they have a few simple remarks to utter. The public does not mark their passing.

Not so of men who have reached high places of life. The deafened hero is a pathetic figure. In our country, for example, much is made of baseball stars. For a few short seasons they are ring with public acclaim, and then come the inevitable day when they are through, and cunning game. They are the men who are conspicuously through. Eminences are hard to reach. The day of glory is short. After that the swift descent and—the third.—Toledo Blade.

Elevation Above Sea Level

Geodetic Survey Is Placing Tablets All Over Canada

The method of the Geodetic Survey of Canada, of noting the various elevations above sea level throughout the Dominion, takes the form of setting 3-inch bronze tablets in conspicuous places, and erecting permanent walls or bases whenever necessary. By reference to these bench marks, as they are called, the elevation above sea level of any part in its vicinity can be ascertained. The tablets are to be found on the tops of hills, on the tops of places of permanence, such as town halls, post offices, libraries, banks, churches, railway stations, grain elevators, schools, armories, water tanks, water works, monuments, highways and railway bridges, subways, tunnels, stone arches, culverts, and on the tops of hills, on the tops of rock cuts, boulders, rock surfaces, and in other locations where they are not likely to be quickly affected by the passage of time.

Investing Hours Of Rest

Great Need Is Sane View Of Using Sabbath Properly

With all our new ideas we have not improved upon the old custom of using the Sabbath as a day of rest and for the worship of Almighty God. That may strike the modern mind as being a trifle old-fashioned, but there is abundant evidence in its every land to show that it is actually and historically correct. It is not necessary on Sunday to lock the motor car in the garage; it is not necessary to wear a particularly long face. The great need is a sane view of properly investing the hours, free from the labor of the week, which are measured out to us between Saturday and Sunday.

Opposed Confederation

For the first time since Confederation, there was no Dominion Day observance of an evening anywhere in Halifax. Consistent with the policy of its owner, C. C. Blackadar, in continued opposition to Confederation, the Acadia Recorder never recognized the anniversary of provincial union by day process on July 1, but on May 10 of this year, after the death of its owner, the Recorder ceased publication.

Norway is working to have all its labor difficulties at any time settled by arbitration.

Prefers New York Route

Expert Points Out Difficulties In Airways Via Greenland

Although the idea of a southern trans-Atlantic air mail route that would bring English letters to the United States through New York is less attractive to Canadians than that of a northern route across Greenland, the project is a much more feasible one, is the opinion of Air Commodore J. A. Chanler, a director of Vickers Aviation, London, and of the Supermarine Aviation Company of Southampton, expressed when in Montreal after an aerial tour of Western Canada.

He saw many reasons why a northern airway would be difficult to establish. Lights would be necessary along the way; landing places would have to be available for emergencies in a part of the world where no one lives now; if radio beacons were to be used, they would be dangerous interference because of the electrical phenomena of the north; heat would be necessary in the plane; sheds and buildings would be needed, and these, too, would have to be heated; and travelling near the equator would obviate most of these difficulties.

First Practical Lifesort

Was Built By Henry Greathouse In 1782

Devotion and courage are inseparably associated with the saving of life, and even though the car-propelled boat has been given place to the motor-boat, the thrill of the launch and the excitement of the race have not entirely remained. The inhabitants of Trinity, in Wales, have witnessed many a thrilling and hazardous rescue, and they will have even greater confidence in their attempts now that their old motor-lifeline has been replaced by a new up-to-date craft. The earliest lifesort was designed by a Frenchman in 1765, but there is no record that it was ever put into service. The first lifesort having its first practical lifesort in 1788, belongs to Henry Greathouse. The Royal National Lifesort Institution, which provides British coastal towns with lifeboats and life-saving apparatus, was founded in 1824.

What City People Miss

Calling At Post Office For Mail

Folk in the big cities miss one of the best entertainments that is the privilege of small-town people—going to the post office. Seven out of ten men and women will stop as they go by, and inquire for or look for mail. The city dweller, on the other hand, expects any, but they don't stop the same. Probably they will drop in twice after one mail is put up and before another comes in, justifying their act with the idea that a letter addressed to them had been misplaced and found. And a town which has a lack-lustre postmaster is up against it, for part of the fun in going to the post office is to joke with the fellow who runs it.

Maybe He Was

Two elderly men, both extremely deaf, sat on a country road. Dave had aching pole in his wagon. When he saw his friend Jim he stopped the horse.

"Goin' fishin'?" shouted Jim. "No," replied Dave. "I'm goin' fishin'."

"Oh," said Jim, "I thought maybe you was goin' fishin'."

More To The Point

Russian educational leader wants the children of the nation to have the right to caricature "czars, capitalists, gendarmes, priests, Fascists, and social-imperialists." If they desire to caricature the "czars," why not have dolls to represent the Communist assassins who murdered the "czars' family"—Los Angeles Times.

Reader: "Dear Editor: What's the best way to find out what a woman thinks of you?"

Editor: "Marry her."

Aunts (to Willis, scolding his thumb): "It's a very nice thumb." Willis (happily): "Taste it!" —En Roig Half Timms, Gothenburg.

The Pending Completion Of Hudson Bay Railway Will Stimulate Mining Interest

With the Hudson Bay Railway in its final season of construction, and with improved passenger and freight service, exploration of mineral properties to which the Bay line is tributary, has started on a really important scale for the first time. Several companies and syndicates have launched programmes to develop groups of claims in the neighborhood of the new steel trail.

A dull mineral season is in view for the region north of Churchill, but reports circulating in mining circles point to interesting activity along the Hudson Bay Railway.

Within the past few weeks, half a dozen parties have travelled north on the line to explore promising areas quietly, before there are signs of a rush to one of the many new discoveries northeast of The Pas.

However, it is unlikely that prospectors will be allowed to travel north of Mile 412 this season, as the necessary arrangements have been made with the federal government. More than one well-known mining man from northern Ontario has reached The Pas this summer with the hope of travelling to Churchill, but they have been disappointed. In one instance, an argument has been over the fact that an eastern station agent had checked his equipment right through to Churchill, and he had hurried to The Pas, only to find that he could not get to the port. Railway officials explained that they had hurried to the prospector, and he has to be content to postpone his trip until another season. It is reported, in The Pas that efforts will also be made this year to trace down Indian legends that deposits of native silver lie in that great triangle east of the Hudson's Bay Railway, and bounded by God's River, the coast, and Oxford Lake on the south.

Last year a few samples of beautiful flinty silver were found their way into The Pas from York Factory and some Indian companions had found the native metal somewhere in the mystic triangle. Excellent detective work on the part of mining engineers failed to show up the origin of the native silver, and the find was considered a remains undivulged.

This year, Indian legends have hinted of spectacular silver to be found in that 62,500 square miles of territory. This season may see a climax to the silent drama of centuries, and who knows but what a second Cobalt may spring up in that little explored region south of York Factory on Hudson Bay.

Power Resources Of Manitoba

Claimed That 72 Per Cent Of Water Power Resources Of Prairies Are Located In Manitoba

The considerable power resources of the Province of Manitoba are estimated at 5,000,000 h.p., of which 200,000 h.p. already are in operation. It is claimed that 72 per cent of all the water power resources of the Prairie Provinces are situated in Manitoba. The Winnipeg River supplies are estimated to be sufficient to provide for a population of 2,500,000 in Winnipeg and to provide employment for 300,000 industrial workers. This power will turn out products worth in the neighborhood of a billion dollars every year.

More Students In Paris

Latest registration figures of the University of Paris, place the total number of students at 65,890, an increase of 2,500 over the preceding scholastic year. Large outlays must be made for more lecture halls, study rooms and laboratories.

Wife (as they return from party): "Do you realize what you did?" Hubby: "No, but I'll admit that it was wrong. What was it?"

New Application Of Marconi's Invention

"Is that Signor Marconi? Could you light my lamp? The electricity company has cut off the current."—Guerni Magazine, Milan.

W. N. U. 1846

Setting Pace In Egg-Laying Contest

Rhode Island Red Has Lead Of Seven Points

Records of the Canadian egg-laying contest at the Dominion Experimental Farm, Ottawa, this year, show egg production to be 27 per cent above last year and 1.6 per cent higher than in 1928 for the corresponding period. Birds entered appear to be swinging into greater production with the approach of summer, 33 per cent having reached or passed the fifty egg mark during the thirty-second week of the contest. It is interesting to note that of those 33 pens, 21 are White Leghorns, and 12 are Rhode Island Reds.

While a pen of Barred Plymouth Rocks holds the leading position in the contest to date the leading individual layer so far is a Rhode Island Red. Two Barred Rock entries and this leading Rhode Island Red have laid a total number of eggs—just a slight advantage in weight on the part of the heavier Rhode Island Red gives her a lead of 700 eggs over the next best.

There is, however, indication that this year's egg-laying contest will show a more gratifying increase in egg production than has been in evidence each year since the contests were instituted in 1919. Some very fine records are likely to be hung up at the close of the contest.

Will Work On "E. P. Ranch"

Two Lancashire Girls Take Job Offered By Professor Carlyle

Two Lancashire girls arrived in Canada recently on the Canadian Pacific steamer "Duchess of York" en route to Kelso, Alberta, where they will start their careers on the "E.P. Ranch."

The two girls, Doris and Muriel Howe, sisters, "We do not know where we are going to do our work, it may be clerical or it may be house work. But that doesn't matter. Professor Carlyle, manager of the Prince of Wales ranch, engaged us and we are looking forward as much to the new job as we are to seeing our brother who is working from Kelso to meet us."

Doris is in the office of a grocery business in Blackpool and her younger sister, Muriel, was in the public library at Blackpool.

Fruit Crop Prospects

Prospects For 1929 Crop Are Considered To Be Good

The fruit crop prospects for 1929, as on June 1st, are encouraging and, generally speaking, indicate the possibility of a total crop approximating that of 1929, according to the Department of Agriculture's crop report No. 2. Cherries, plums, peaches and grapes, all indicate considerable increase over last year ranging from 9 per cent. In the case of cherries to 34 per cent. For plums, promise well and while the total crop is expected to be less than last year, indications point to a yield equal to or slightly heavier than the average commercial crop for the five-year period 1925-29, estimated at 3,178,124 barrels.

B.C. Canned Salmon

Importance of Canadian Industry Shown By Figures

Shipments of British Columbia canned salmon from Vancouver to points outside of Canada in 1928 amounted in all to 1,213,697 cases of 48 pounds each, indicating the importance of the Pacific Coast canned salmon industry as a factor in the external trade of Canada. Australian countries continued to be first among the purchasers, with France second and the British Isles third. Thirty different countries were customers of the British Columbia canned salmon exporters last year.

Does Not Indicate Hard Times That the American people are still "rolling along" on rubber tires is evident from the March consumption figures of gasoline for forty-three states of the Union, which show use of 26,000,000 gallons daily, or 7.1 per cent more than in the corresponding month of 1928. This does not look as much like "hard times" or decreased purchasing power.

There are upwards of 1,500 post-boys delivering mail in various parts of England.

The London city directory contains such names as Golebny, Whiff, Ome, Cops and Looney.

ALPINISTS—Upper Maligne Park.

Into a country where there are many important peaks still unexplored and even unnamed, will come Alpinists from all over the world for the 1930 annual camp of the Alpine Club of Canada, July 28th to August 12th, in Jasper National Park. Alpine members of the medical profession of England, will be among them at this year's camp.

In this vast mountain kingdom, climbers will try their skill in the Maligne Lake region, where such peaks as Mt. Banquet, Mt. Churchill, Mt. Unwin, Mt. Warren, Mt. Mary Vaux, Mt. Maligne, and Mt. Brinzae—ranging from ten to eleven thousand feet in height, offer most interesting climbing problems.

It is perhaps the splendid predilection, the meaning of effects that distinguishes this region from all others. In the Rockies the folly of comparison, where beauty is concerned, is always obvious. There are a score of lakes, each different, which, once seen, are likely to be in the heart forever. Yet this stands out among them all. Where many of the others are chamber music, Maligne is the great orchestra. The composition forms one picture.

Big Building Year

Several Large Building Contracts Are Announced In Saskatoon

It looks like a big building year in Saskatoon. A new \$200,000 apartment house and a new \$500,000 technical school are now under construction, while the Dominion Government is spending about \$600,000 on the addition to its grain elevator. Also, contracts running to about \$1,000,000 (in another), of the Saskatchewan Power Commission.

New Type Mail Box

Sweden Installing One Which Gives Detailed Information As To Contents

A new type of mail box with a detailed information chart is now being installed in Stockholm under the supervision of Sweden's postmaster, General Anders Orm. The chart not only tells when the box is emptied, but also gives the location of the nearest post office or automatic stamp vending machine, as well as postal rates and the departure of mail trains for various parts of Sweden and abroad.

FASHION

PARIS FAVORS PLAINS

A conservative printed crepe silk with lingerie collar and cuffs of crepe organdie reflects the newest ideas of Paris in plaited skirt treatment.

Diagonal seaming emphasizes the smooth fit through the hips, and at same time carries out the lengthened movement to give height to the figure.

A leather belt nips the natural waistline.

This charming semi-clothes frock can be made with 3 1/2 yards of 39-inch material with 3/4 yard of 39-inch contrasting in the medium size.

Style No. 5133 is designed in sizes 16, 18 years, 20, 22, 24 and 26 inches bust.

It is strikingly smart in plain crepe silk in hazy blue shade with sheer organdie collar and cuffs.

Parrot green shantung with sequined and dashingly chic and smart.

Navy blue wool crepe with white silk piping, showing good travel, street or sport.

The British Empire is twined in orange-red colouring, a red tunic with natural linen collar and cuffs.

Wool jersey dress of china, men's silk shirt, linen and pique.

It is simple to make. The bodice is long, wide and rounded through the hips. The skirt is pressed into inverted pleats at waist, showing how well effect is obtained.

Price 25 cents in stamps or coin (coin preferred). Address Pattern Department.

High Milling Quality Of Canadian Wheat Flour Is Proven Under Rigid Tests

New Provincial Park For British Columbia

Is One Of World's Finest Stands Of Timber

Cameron Lake Forest, on Vancouver Island, one of the world's finest stands of timber, will be made a provincial park under the plan announced by Premier Tomin. As a first step in this project, probably the most important ever undertaken in Canada to preserve a virgin forest, the government has ordered an immediate cruise of the entire Cameron Lake area. This will be undertaken by the provincial forestry service. The report will be filed with the government before long.

The Cameron Lake Forest, known to travellers from every part of the world, lies between the lake and the hills which are crowned by snow-capped Mount Arrowsmith. It is a vast area of giant fir, cedar and balsam, growing close together and reaching to such heights that the island highways are hidden below them, in twilight on a sunny day.

Women's Institutes

1,150 Women's Institutes In Rural Districts Of Ontario

There are now 1,150 Women's Institutes in the rural districts of the Province of Ontario with a membership of over 40,000. These institutes are promoting social contacts and whatever is beneficial to the community as a whole, especially to women and children, through co-operative effort. The movement started at Stony Creek, Ontario, in 1897, has now become world wide. Its principles, wherever they exist, are non-sectarian and non-party political. Recently an international conference of representatives of Women's Institutes was held at Vienna, Austria, at which delegates from most of the important countries were present.

Destructive Wheat Disease

Loss Caused By Foot - Not Greater Than Any Other

Of all the fungous diseases affecting wheat "Take-All" or foot-rot, is the most destructive, observed the Dominion Minister of the Department of Agriculture, at Ottawa. The actual loss caused by it is far greater than by any other single disease, rust included, or perhaps a combination of all known fungous diseases affecting wheat. A peculiar thing about this disease is that it appears only once in a series of years. Fortunately for Canada, the disease of proper care and the widespread use of fungicides by Western farmers have kept the disease from becoming seriously established in Canada.

When Fate Was Cruel

Income Tax Papers Only Mail Received

Of 130 mail bags on a steamer wrecked on Shetland only four have been washed ashore, and of these only three have retained its contents in a condition fit for distribution. This was a bag of income tax papers—an instance of that "dry" humor for which the Scotch is famous. The worst of it is that when the papers are returned the authorities will not be able to distinguish the really marks of the ocean from the tears shed by those by whom the documents were received.

Study Indian Traits

Four French Scouts, belonging to an organization similar to the Boy Scouts of Canada, except that they are college students, arrived recently at Banff, Alberta, where in the Canadian Rockies they will make a study of Indians, for the ethnographical museum of Paris. They are Paul Cusack, Paul Desjardins, Raymond, and Leon Chalk, photographer.

The British Empire

The British Empire occupies about one-quarter of the habitable surface of the earth and its population exceeds one-quarter of the estimated number of the human race.

Manitoba Telephone Building

The Manitoba telephone system will commence construction on a 15-story exchange this year which will cost in the neighborhood of \$1,000,000. Tyndal sons will be used.

An alert Italian delicatessen dealer built his shop over an old mine shaft, so that the upcoming stream of cold air never to keep his perishable commodities cool.

The high milling quality of Canadian wheat flour has recently been further proved by the Research Department of the Board of Grain Commissioners for Canada. The result of a series of reacting tests. These tests show that blending of from 20 to 50 per cent, respectively of Canadian flour with the best flour from other countries gives bread varying from 1 1/4 to 4 3/4 per cent, more cubical content than the country's domestic flour will produce. The largest loaf made during the tests was made from all Canadian flour. Samples of Russian, French, Australian, German, Danubian, Argentine and other wheats were used in the tests. Flour with weaker flour grown in other countries than the samples obtained and leaves made from the flour and the results carefully noted. The addition of 10 per cent Canadian flour with the unbleached flour of the wheat of each country was then added and the size of the loaf was increased from 10 to 25 per cent. In the Russian to 25 per cent, in the Argentine. An increase to 35 per cent, of content than the country's domestic flour will produce. It is an improvement in the size of the loaf.

Canadian Tobacco Industry

Considerable Quantity Of Canadian Product To Be Shipped To England

"If the necessity arises, the government will not hesitate to appoint a special commissioner in England to look after the interests of the Canadian tobacco growers," stated Hon. James Macdonald, Minister of Trade and Commerce here, in commenting on the Canadian tobacco industry.

"The Canadian Government is in close touch with the tobacco growing industry," said Hon. Mr. Macdonald, "and through its trade agents in Great Britain, has already put the British manufacturer in close touch with Canadian growers. It is expected a considerable quantity of Canadian tobacco will be shipped to Great Britain this year," he said.

Produces Better Eggs

Poultry Experts Find Large Hen Excels In Production

The larger the hen the better the eggs she lays and the more there are of them. Poultry experts of the Dominion Department of Agriculture find that body weight has a very direct relation to egg production. A three pound hen will average 137.9 eggs a year, weighing 25 ounces to the dozen. With each 1/2 pound increase in weight there is an increase in the number of eggs laid and their weight per dozen—a four and a half pound hen will lay an average of 204.8 eggs a year weighing 24.5 ounces to the dozen. This item should be of particular interest to farmers keeping poultry flocks.

Ornamental Shrubs

Development Of Hardy Types Of Shrubs In Western Canada

Not the least important of the work being done by the Experimental Farms and Stations of the Dominion Department of Agriculture is the development of types of ornamental trees and shrubs and hardy perennials, annuals, and garden flowers are suitable for use in all parts of Canada. Many of these have been found suited to even the most difficult climatic conditions, and the report of the Experimental Farms or Station nearest you will provide an indication of varieties adapted to use in your locality.

Door Never Locked

The door of St. Martin's-in-the-Fields, one of London's famous churches, is never locked. For some reason they believe in St. Martin's that the church should be a sanctuary for those who are cold and wet, penniless and hungry, as well as a place of worship for all.

Airplanes are being used in battles against insect pests in Peru.

"I warn you that it will have to pay 5c. fine for bathing here."

"Certainly. Just take me out of my jacket, because I'm committing suicide," Gutierrez, Madrid.

9133

WORLD HAPPENINGS
BRIEFLY TOLD

Five thousand members of the American Legion and lady members of the Legion auxiliary are to visit Winnipeg for two days in August.

A British Empire Trade Exhibition, the first of its kind to be held in any country outside the empire, is to be held in Buenos Aires from March 14 to April 27, 1931.

A new India House was opened in London by King George with an expenditure of hope for the emergence of India from her present troublous era into days of peace and contentment.

Official figures on unemployment, showed 1,815,300 out of work in Britain on June 23. This was about 70,000 less than on June 16, but 697,183 above the same date a year ago.

Sir Joseph Ward, former premier of New Zealand, who resigned a few weeks ago owing to ill health, is dead. Sir Joseph, who was known as "the grand old man" of New Zealand, was 74 years of age.

Ralph Collins, Edmonton, Alberta, has been awarded second prize in an oratorical contest at the convention of the Optimist International, in Erie, Pa. Seven boys from the cities of the United States and Canada, competed. David Wolf, Washington, D.C., was first.

Marriages at famous Gretna Green, the elopers' haven in Scotland, are to be made extinct by legislation. The Government plans to legislate that from now on marriages will be made legal only marriages which have been performed by a clergyman or a registrar.

The Quai D'Orsay has submitted the name of Andre Henry, who is French minister to Spain, to the Canadian Government for approval as the next French minister to Canada. Hon. Jean Knight, the first holder of this post, is returning to France to become head of the French Government Press Bureau.

Plans To Visit the Moon

Scientists Has Perfected Model of a Rocket That Will Make Trip to the Moon.

At Horst, a little hamlet in the Baltic, Professor Oberth has been very busy of late perfecting an exact model of the rocket in which he intends visiting the moon. "This model rocket is to be shot up by the explosion of the gas it contains and instruments concealed in it will record the composition of the atmosphere through which it travels. An automatic parachute will bring the rocket down again when the instruments are exhausted. The rocket-model is expected to reach a height of 100 kilometers and to bring back valuable secrets.

Boost For Alberta

Five Thousand Samples Of Alberta Wheat Sent To American Visitors

By way of an appropriate "boost" for Alberta, Hon. George Hood, Minister of Agriculture for the province, sent off 5,000 samples of Alberta wheat to American visitors to the recent Shriners convention at Toronto. It was pointed out that Alberta has carried off the world's wheat championship at the annual International Exposition at Chicago, four times during the past seven years, the honor going last year to Joseph H. B. Smith, of Wolf Creek.

Building Permits

Building permits issued by 61 cities in Canada during May of this year were valued at \$1,621,302. For the first five months of 1930 the total value of building permits issued by these cities had a value of \$6,267,966.

A bird's eye is protected by three eyelids.

Another peace note. Italy will build twenty more warships.

A. J. Chamberlin, of Toronto, was a close second to Farquharson in the individual total, winning a first and second in the indoor events to add to the second-place in the outdoor contests, won for him a trip to England as the guest of Lord Wakefield, of Hythe. He had a total of 17 points.

Will Explore Arctic Regions

Youthful Scientists To Spend Year In the North

Fifteen youthful explorers, whose average age is only 23 years, sailed from London recently aboard the exploration ship "Quest" for a year's exploration of the arctic regions. Their work will be done on the ice-covered stretches of Greenland and Iceland. The purpose of the voyage, which is under the auspices of the Royal Geographical Society, is to obtain information with a view to establishing an air route from England to North America across the Arctic region, with only 300 miles over the sea. H. C. Watkins, 23-year-old explorer, is leader of the expedition. His fourteen companions are all about the same age, and each is a specialist.

Watkins made a scientific exploration of Labrador last year, and of Spitzbergen the year before. The expedition will establish a base on the south-eastern coast of Greenland and a station on top of the ice cap, 8,000 feet above sea level. From there they will make notes on meteorological conditions in connection with flying.

The hold of the "Quest" was packed with a year's food supply, including six tons of food, five tons of equipment, two airplanes, two speed sledges, and a large number of meteorological instruments furnished by the government were included in the equipment.

A passengered passenger is a young turkey who is doomed to be served for the explorers' Christmas dinner. Reports here said that the data gathered proves the feasibility of the air route, a test flight will be made in the autumn. The expedition is similar survey on the western side of the American continent.

Scotland's War Memorial

Not Even the Humbled Worker Has Been Forgotten

No one seems to be forgotten in Scotland's wonderful war memorial which is built on the Rock of Edinburgh.

There it stands glowing with the carved and colored bays of every Scottish regiment that served in the Great War. While in bronze friezes and stained-glass windows, sailors, artillerymen, alermen, chaplains, nurses, and other workers are depicted. Even birds and beasts have their memorial.

Remembered on the walls are the words "Forever and the humble beasts that served and died." Then a commotion framing the heads of a horse, a mule, a camel, a message dog, and other animals, with a cage of carrier pigeons and a group of canaries and mice inscribed, "The tunnelers' friends," because these little creatures are used underground, where their swift collapse has their memorial.

Not even the humblest worker has been forgotten by the generous-hearted men who planned the building. The shrine is a block of marble set on the rock which rises through the floor, and on this block is a casing closed by the King and Queen enclosing books containing the names of every Scotsman who fell in the war. It is a place of pilgrimage to Scotsmen from all over the world, this holy place where the noblest heroes and the humblest creatures are all remembered together.

Vancouver Boy Wins

Trip To England

Selected As Best All Around Canadian Model Aircraft Builder of Roas Farquharson, 16, of Vancouver, was selected as the best all-around Canadian model aircraft builder at the close of the national championships held at Ottawa. His victory, in both indoor events, added to his second and third places in the outdoor contests, won for him a trip to England as the guest of Lord Wakefield, of Hythe. He had a total of 17 points.

A. J. Chamberlin, of Toronto, was a close second to Farquharson in the individual total, winning a first and second in the indoor events to add to the second-place in the outdoor contests, won for him a trip to England as the guest of Lord Wakefield, of Hythe. He had a total of 17 points.

Canadian Cakes

During the past few years there has been such a marked increase in the use of cake for domestic purposes in Canada that this food bids fair to become a serious rival of antirachis, which has long been regarded as the standard food for this purpose, and is used in the provinces of Ontario and Quebec.

Minister—And what parable do you like best, my son?

Willis—The one about the multitude that loafs and fishes.

Takes First Glider Lesson

Prince Of Wales Coached By Famous German Pilot

The Prince of Wales has taken his first glider lesson.

The lesson was given near Leves, Sussex, by Richard Kesteven, a German, who is reputed to be the world's champion glider pilot. It consisted of a demonstration as to how to operate the glider, and it was understood the prince did not actually pilot the ship.

The prince long "has been an enthusiastic aviator and is reputed to be an excellent pilot, although for safety's sake he is never permitted to make solo flights. He always is accompanied on his flights by one of his best Royal Air Force pilots but the prince handles the controls except when taking off or landing on strange or difficult landing fields.

Montreal Has Crowned Rapidly

Is Now Fifth Largest City On the Continent

Few cities in Canada have shown such substantial growth as Montreal. Within a decade the total assessable property has doubled in value and is now \$1,200,000,000. In 1914 the population was 629,000; today there are a million people in the city proper. In 1914 there were 153 miles of streets and today there are 600 miles. The municipal revenue, which in 1914 was \$1,000,000, is now \$30,700,000. Montreal has reached the rank of the fifth largest city on the continent.

Kept Appointment

Four Men Keep Tryst Started 31 Years Ago

Keeping a tryst started 31 years ago, four men met in Trafalgar Square, London, England, on a recent night. In 1899 six young decorative artists, H. E. Handfield, G. MacDonald, G. Clifton, E. Bille, Brown and Edwards, were notified that the studio in which they worked was to be razed. They then made a vow to meet once a year. This year only Mandel MacDonald, Clifton and Bille were able to attend, but the two absent ones sent telegraphic greetings to their friends.

Agricultural Conventions

Efforts will be made to bring as many large agricultural conventions as possible to the west at the time of the World's Grain Exhibition and Conference, in Regina, in 1932. According to a decision at a committee session, such conventions will be invited to meet directly prior to or following the show, in cities other than Regina. Delegates will thus be able to attend Regina session.

Legislative Wheel Pooling

In accordance with the decision of the Delegates of the Saskatchewan Wheat Pool of the recent semi-annual conference, a referendum will be taken among pool members on the question of legislative pooling. Ballots will be mailed from head office not later than August 1, and each candidate is being asked to register a vote on the question.

English Students For Canada

Hamilton Fyfe, the new head master of Queen's University, Kingston, stated recently that a movement was reaching fruition by which English public school boys will go to Canadian universities in the same manner as American and South African Rhodes scholars at Oxford.

SUNDAY SCHOOL LESSON

JULY 10

MOSES "A COURAGEOUS LEADER"

Golden Text: "By faith he forsook Egypt, not fearing the wrath of a king; for he endured, as seeing him who is invisible."—Hebrews 11:27.

Readings: Exodus 1:1-12; 2:1-22; 3:1-14; 11:1-10; 32:30-33; Deuteronomy 34:1-8; Hebrews 11:23-29.

Devotional Reading: Psalm 90, 12-17.

Explanations and Comments

The Call Of Moses, verses 1-10.—After numerous attempts to become the leader of his people, deliver them from oppression in Egypt and bring them forth on their way to the Promised Land, came to Moses as, in his care of the flock of his father-in-law, Jethro, the priest of Midian, he wandered from the back of the wilderness (that is, the west; the east is always the front). To Jethro, the mountain of God. There before the bush that burned and yet was not consumed, Moses heard God speak to him. In his pictorial way of portraying his inner experience, he says that he saw the glory of the wilderness made have been told by Moses himself and in value and given by him in this pictorial way. The burning bush may have been an experience of an inner experience—the flame of enthusiasm that he saw as it came to him. It is assuredly true that Moses had seen the divine glory in the glowing beauty of the bush, he was able to see God in the things of everyday life.

"Moses stood before an ordinary bush, and he became aware of God, Jeremiah stood before a budding almond tree, and it became to him the sign of the deity."—J. H. Jowett.

"Draw not nigh higher, put off thy shoes (sandals) from off thy feet, for the place whereon thou standest is holy ground." Recall Jacob's sense of God's presence at Bethel and the holiness of the place.

"Earth's crowned with heaven, and every common bush affords with God."

But only who sees, takes off his shoes.

The rest sit round it and pluck blackberries." Mrs. Browning.

With a new flash of insight Moses knew that he was calling him to a stupendous task, that it was his will that he should return to Egypt to lead his people out of bondage and into the promised land. All this is expressed in the words of verse 17: "I will send thee to Egypt."

Railway Passes In The Rockies

The map sheets of the Interprovincial Boundary between Alberta and British Columbia published by the Topographical Survey, Department of the Interior, show that three passes of 4,453 feet; Kicking Horse Pass 5,520 feet, and Yellowhead Pass, 3,711 feet.

English Students For Canada

Hamilton Fyfe, the new head master of Queen's University, Kingston, stated recently that a movement was reaching fruition by which English public school boys will go to Canadian universities in the same manner as American and South African Rhodes scholars at Oxford.

Reciprocal Trade

British Bankers In Favor Of Free Trade Within the Empire

Reciprocal trade agreements between Great Britain and the United States, the British Empire and the retention of an open market for Empire products was urged in a resolution adopted recently by representatives of several leading British banks meeting in the offices of Hambro's Bank, London, England. The meeting was presided over by Sir Eric Hambro.

"Urgent measures for the promotion of inter-Imperial trade are needed to secure and extend the market for British products, both at home and through export trade," the resolution read. "Bitter experience has taught Britain, that hopes expressed four years ago in the plea for removal of restrictions upon European trade have failed. Restrictions have been materially increased and the sale of surplus foreign products in British markets has steadily grown. While we retain hope for the ultimate extension of free trade worldwide, we believe the immediate step for securing and extending the market for British goods lies in reciprocal trade agreements between the nations of the British Empire. As a condition of securing these agreements we believe it remains an open market for all goods and services which are prepared to impose duties on all imports from other countries."

London Traffic Project

Scheme To Construct Underground Lines For Transportation Of Goods

A scheme is on hand to make possible the removal of goods traffic from London streets. It consists of the construction of underground lines, with fifty-four stations, for the sole purpose of carrying goods. The promoters are anxious to build seventy-five miles of tubes at a cost of about \$200,000,000. All the principal railway terminal goods yards would be connected; the docks, wharves, and public stores would have their private stations. It is said that 225,000,000 tons of goods are carried annually in London, and the trade of the Port of London amounts to \$144,000,000 a year. According to the promoters of the new scheme the cost of existing congestion in the streets is \$120,000,000 per annum, while the railways have estimated at \$350,000 a year the amount of money they lose by the detention of goods lorries at Billingsgate Market alone.

Eighteenth Century Newspapers

The first newspaper in Quebec appeared in 1764 when the Quebec Gazette was founded. The "Royal Gazette" and "New Brunswick Advertiser" appeared at St. John's in 1785, and the first paper in what was then Upper Canada appeared in 1793 at Niagara. (These Newark), the name of the "Upper Canada Gazette and American Oracle."

China, home of the silkworm, is now importing artificial silk.

It takes eight large eggs, or nine small eggs, to make a pound.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme temperatures, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

About Town and Country

Wednesday half holiday ob-
served during July.

The Oyen girls who attended
the girls camp at Gooseberry
Lake returned to Oyen last
Friday, when a number of boys
joined the camp for a ten day
stay.

Dr. S. R. McGregor and Mr.
Art Campbell spent the week-
end at Gooseberry Lake.

Eugene Wilkenson of Cal-
gary is the guest of Rev. C. Ly-
nett.

Mr. and Mrs. H. E. Bradford
and family, who have been
spending a vacation returned
to town the end of last week.

Miss Stewart a former mem-
ber of Oyen school staff, was
an Oyen visitor last Monday.

The Misses Laura and Melva
Walker are spending a holiday
at the home of their parents
Mr. and Mrs. W. T. A. Walker.

Mr. H. C. Chapin and family
of Edmonton, Alta., were week-
end guests at the home of his
brother, Mr. H. R. Chapin.

Mr. C. L. Dunford, who left
last Friday for Lashburn, Sask.,
accompanied by Mrs. C. L. Wil-
son of Sibbald, returned to
Oyen with his family last Mon-
day.

Haven, and Mrs. A. Wade
and daughter Jean, of Oyen, return-
ed to town yesterday after
spending a few days at Goose-
berry Lake.

Mrs. R. Crawford and Mr.
William Kerr of Milverton,
Ont., are the guests of Mr. and
Mrs. A. R. Kerr.

Mr. Chester E. Moffat who
was one of the first members
of the staff of the News in 1914,
and is now advertising man-
ager for the T. Eaton Co., in Ed-
monton, was an Oyen visitor
last Monday evening. In his
spare time Mr. Moffat is an en-
thusiastic aviator.

Mr. and Mrs. C. P. Snyder left
last Monday evening en route
to Calgary and Edmonton by
motor.

Mr. and Mrs. Frank Neid and
family returned to Oyen last
Saturday after spending a vaca-
tion in Calgary.

Mr. and Mrs. J. P. Rorabeck
who were Calgary visitors dur-
ing the fore part of last week,
returned to Oyen last Wednes-
day evening.

Mr. and Mrs. George Lang-
muir and family and Mrs. Wes.
Horre, left last Thursday for
Buffalo Lake, where they will
spend a vacation.

Mr. J. J. Purcell, who left for
Calgary last Sunday, returned
to Oyen with Mrs. Purcell and
son yesterday.

Mr. and Mrs. W. D. Morrell
and family, Robert and Jimmie
Lees, Opal and Lily McMurray,
Ed. Davis, Edmund Todd and
Margaret Heath, who spent
the later part of last week at
Gooseberry Lake, returned to
Oyen Sunday evening.

Mrs. Whitlock and family
who returned to Oyen from
Gooseberry Lake the fore part
of the week, left George there
at the boys camp.

Mr. and Mrs. S. A. Miller and
son Bert, left last Sunday for
Calgary and Banff, where they
will spend a vacation.

Mr. and Mrs. A. J. Funnell
who have been spending a few
days in Calgary, returned to
Oyen yesterday.

Miss Winnie Love who spent
a few days in Calgary after
visiting in Munson, returned to
Oyen yesterday.

Mr. W. V. Müller and son
Warren, who were Calgary
Stampede visitors, returned to
Oyen last Saturday.

Mr. and Mrs. Charles Stewart
and son Jimmy, Miss Bella
Lees and Gordon MacArthur
returned to Oyen last Sunday
after spending a holiday in
Calgary and Banff.

Mrs. J. C. Desso left last
Friday for Edmonton, where she
will visit her daughter Mrs.
Herbert Hancock.

After attending Kindersley
fair last Thursday, Mr. and
Mrs. S. A. Miller, had to return
to Oyen by train the highway
being impassable through rain.

Mr. Howard L. Packard ar-
rived in Oyen last Friday from
Glenworth, Sask., to join the
staff of the Bank of Toronto.

Mr. Harry Austen and child-
ren returned to Oyen last
Monday, after spending a holi-
day at Buffalo Lake.

Mr. and Mrs. S. E. Trevin
and family are spending a vaca-
tion at Gooseberry Lake.

Mr. and Mrs. Joe Odden and
family, Mr. and Mrs. Sam
Davis and family, who motor-
ed to Gooseberry Lake last
Sunday, left the following
morning for Wainwright.

Mr. P. A. Watrin returned to
Oyen last Sunday after spend-
ing a few days in Calgary at
the Stampede.

Mrs. T. M. Nunn and son
Stanley, left yesterday for the
coast where they will spend a
holiday.

Mr. Howard Munroe and Mr.
William Stevenson left last
Sunday for Calgary and points
west.

Mr. J. Gall of Oyen and Mr.
Jack Meacham of Benton, were
week-end visitors at Goose-
berry Lake.

Mrs. F. C. McClean left last
Monday for Calgary where she
will visit friends.

Mr. Frank Todd and Mr.
Howard Wade motored to Cal-
gary last Monday, returning to
Oyen this morning.

Mr. Wetmore a representa-
tive of the Utilities Corpora-
tion of Texas has been visiting
Mr. A. O. MacArthur, manager
of the Fuego Oil Co., this week.
Mr. Wetmore's Company is in-
terested in the distribution of
gas throughout the western
provinces and is at present bid-
ding for franchises at Regina,
Saskatoon, Lethbridge and
other points in Saskatchewan.

Mr. Wetmore is quite elated
with the prospects of the Fuego
field as a means of supplying
gas for the towns and cities of
the west and pointed out that
the field was very centrally lo-
cated and could be drawn on
from all directions. Other
officials of the company are ex-
pected to visit the Fuego field
in a few days.

A dance will be held twelve
miles south of Oyen at Heffer-
man's barn, on Tuesday, (July
22). Big time assured. Good
music. Come on, come all.

Mr. Gordon Caswell and fam-
ily left this morning for Cal-
gary, en route to Field, B.C.
From Calgary west they will
be accompanied by Mr. William
Caswell and family who will
spend a vacation with them.

Mr. T. M. McGarry of Drum-
heller was an Oyen visitor last
Wednesday afternoon, while
en route home after taking his
family to Zealandia, Sask.

Mr. and Mrs. David A. Peck
left this morning for Olds, en
route to Calgary and points
west, to spend a short holiday.
They were accompanied by
Howard Balsam.

On Sunday evening, July 13,
1930, the wife of Mr. E. G. Law,
President of the Fuego Oil
Company Limited of Oyen, and
also President of the Law Con-
struction Co., of Toronto passed
away.

The late Mrs. Law was been
ailing for some time with
cancer which finally caused her
death. She leaves behind her
a husband and two daughters
to mourn her loss.

The late Mrs. Law was an
outstanding figure in Toronto;
she was the essence of kindness,
much of her time was spent in
trying to relieve the suffering
of others. She was a noble
woman and one who was loved
by all who knew her purity
and virtue was the keynote of
her life and she will live long
in the memory of those who
knew her for the sterling qual-
ities she possessed.

Another one has passed beyond
the soiled things of life
to the place of Peace and Rest
Far from this world of strife
The radiance of her soul is left
With those who loved her dear
And long will shine to guide us
In the path she trod while here.
Good-bye, dear friend, we'll miss you
Your smile will still remain
Your life has been a life of love
Our loss we know is your gain.
